INFRASTRUCTURE, CLOUD & TOOLS:	AWS, Docker, CI/CD, Git, Vercel, Postman, Swagger, Netlify, Selenium, Figma, Jira

WORK EXPERIENCE

Front End Developer | KoiReader — Bengaluru, India **05/2025 – Present**

Tech: Next.js, Typescript, Python, FastAPI, REST API, GraphQL, WebSockets, WebRTC, FastRTC, Ant Design, Styled Components

- Architected a real-time yard management dashboard for a **renowned German automotive brand**, utilizing **WebSockets** to seamlessly synchronize dual Security and Logistics applications for live monitoring of concurrent trailer traffic across **multiple gates and parallel inbound/outbound lanes**.
- Architected comprehensive **data visualization dashboards** for a multinational beverage enterprise, integrating interactive charts and tables to centralize warehouse analytics and track **key performance metrics**.
- Engineered an interactive **self-service kiosk UI** for automated truck logistics at a top-tier automotive yard, featuring a custom-built **glassmorphism virtual keyboard** to streamline driver check-ins.
- Engineered low-latency WebRTC camera streaming via **FastAPI** and **Next.js**, reducing video feed latency by **40%** to enable real-time warehouse **item scanning**.
- Developed a real-time **safety and compliance dashboard** powered by **WebSockets**, establishing an event-driven architecture for instantaneous alert broadcasting and rapid incident response.

Software Development Engineer - 1 | Wealthy — Bengaluru, India **04/2023 – 05/2025**

Tech: Next.js, TypeScript, Node.js, Express.js, REST API, GraphQL, MongoDB, CSS3, Styled Components, Figma

- Spearheaded an end-to-end insurance portal in **Next.js** and redesigned core UI/UX flows across **5 insurance verticals** (health, auto, term, savings), automating partner proposal generation to drive a **25% increase** in conversions while reducing user drop-off by **30%**.
- Built a high-performance stock trading terminal with complex REST API integrations, reducing UI rendering latency by **35%** for real-time market data.
- Developed an automated email template generator, eliminating manual HTML coding and cutting marketing campaign creation time by **60%**.

SDE Intern | Wealthy — Bengaluru, India **12/2022 – 03/2023**

Tech: Next.js, JavaScript, TypeScript, SSR & SEO, Highcharts, AOS Animations, Styled Components, CSS, Figma

- Designed and developed a dynamic **stock screener** SPA and comprehensive company detail pages featuring interactive **historical charts and deep financial metrics**, delivering real-time market analysis tools to support **10,000+ monthly active users**.
- Designed and engineered high-performance **blog architectures** using **Next.js**, implementing rigorous SEO optimizations that boosted organic search traffic and increased Google Lighthouse scores by **40%**.

Web Designer (Internship) | Toxsl — Chandigarh, India **05/2022 – 12/2022**

Tech: HTML5, CSS3, Figma, Php, Yii 2

- Engineered scalable UI modules across **4+ enterprise ERP and HR platforms**, enhancing internal workflow efficiency by **20%**.
- Converted complex Figma prototypes into responsive HTML/CSS interfaces, accelerating client delivery timelines by **15%**.
- Enforced pixel-perfect, cross-browser compatibility standards, reducing UI regression bugs by **30%** during staging and QA phases.

Web Developer | Worked as Freelancer — Freelancing (Remote) **05/2018 – 11/2018**

- Developed **10+ high-converting landing pages** utilizing modern frontend practices, increasing client user engagement by **25%**.

- Delivered SEO-optimized web applications, driving a **30% average increase** in organic traffic across multiple client portfolios.

EDUCATION

Rayat Bahra University | Bachelor of Technology - BTech in Computer Science and Engineering 05/2019 – 05/2022

Lovely Professional University | Polytechnic Diploma 04/2016 – 04/2019
